

## PRODUCT FICHE

|   |       |  |
|---|-------|--|
| <b>Manufacturer</b>   |       | <br>RXM42A5V1B<br>FTXM42A5V1B |
| <b>Outdoor unit</b>   |       |  |
| <b>Indoor unit</b>  |       |  |
| <b>Outdoor sound power level (dB)</b>                               | dB(A) | 61.0   |
| <b>Indoor sound level</b>   | dB(A) | 60.0   |
| <b>The refrigerant (GWP)</b>  |       | R-32 (675)   |
| <b>Cooling mode</b>   |       |  |
| <b>SEER</b>   |       | 8.11   |
| <b>Energy efficiency class</b>                                      |       | A++  |
| <b>Annual electricity consumption</b>                               | kWh/a | 181  |
| <b>Design load Pdesignc</b>   | kW    | 4.20   |
| <b>Heating mode: Average climate<br/>Design temperature = -10°C</b> |       |  |
| <b>SCOP</b>   |       | 5.00   |
| <b>Energy efficiency class</b>                                      |       | A++  |
| <b>Annual electricity consumption</b>                               | kWh/a | 1120   |
| <b>Design load Pdesignh at -10°C</b>                                | kW    | 4.00   |
| <b>Required back up heating capacity at -10°C</b>                   | kW    | 0.00   |
| <b>Declared capacity at -10°C</b>                                   | kW    | 4  |
| <b>Heating mode: Warm climate<br/>Design temperature = 2°C</b>      |       |  |
| <b>SCOP</b>   |       | 6.25   |
| <b>Energy efficiency class</b>                                      |       | A+++   |
| <b>Annual electricity consumption</b>                               | kWh/a | 484  |
| <b>Design load Pdesignh at 2°C</b>                                  | kW    | 2.16   |
| <b>Required back up heating capacity at 2°C</b>                     | kW    | 0.00   |
| <b>Declared capacity at 2°C</b>                                     | kW    | 2.16   |
| <b>Heating mode: Cold climate<br/>Design temperature = -22°C</b>    |       |  |
| <b>SCOP</b>   |       |  |
| <b>Energy efficiency class</b>                                      |       |  |
| <b>Annual electricity consumption</b>                               | kWh/a |  |
| <b>Design load Pdesignh at -22°C</b>                                | kW    |  |
| <b>Required backup heating capacity at -22°C</b>                    | kW    |  |
| <b>Declared capacity at -22°C</b>                                   | kW    |  |

Refrigerant leakage contributes to climate change. Refrigerant with lower global warming potential (GWP) would contribute less to global warming than a refrigerant with higher GWP, if leaked to the atmosphere. This appliance contains a refrigerant fluid with a GWP equal to 675. This means that if 1 kg of this refrigerant fluid would be leaked to the atmosphere, the impact on global warming would be 675 times higher than 1 kg of CO<sub>2</sub>, over a period of 100 years. Never try to interfere with the refrigerant circuit yourself or disassemble the product yourself and always ask a professional.

\*2 Energy consumption based on standard test results. Actual energy consumption will depend on how the appliance is used and where it is located.
